In the Claims

Kindly amend the claim as follows:

1-2 (Canceled)

- 3. (Currently Amended) A chimeric protein heterodimer complex, wherein a chimeric protein comprises an α chain immunoglobulin heavy chain- β chain immunoglobulin heavy chain chimeric protein heterodimer complex, wherein a chimeric protein comprising the α chain of an integrin and the heavy chain of an immunoglobulin and a chimeric protein comprising the β chain of the integrin and the heavy chain of the immunoglobulin are bound to each other by a disulfide bond between the heavy chains and stably associated with its function retained.
- 4. (Previously Amended) A chimeric protein heterodimer complex, according to claim 3, wherein the α 1, α 2, α 3, α 4, α 5, α 6, α 7, α 8, α 9, α 9, α 0, α 1, α 1 or α 1.
- 5. (Previously Amended) A chimeric protein heterodimer complex, according to claim 3, wherein the β chain of said integrin in β 1, β 2, β 3, β 4, β 5, β 6, β 7 or β 8.
- 6. (Previously Amended) A chimeric protein heterodimer complex, according to claim 3, wherein the α chain of an integrin is α 4 or α 2 and the β chain is β 1.
- 7. (Previously Amended) A chimeric protein heterodimer complex, according to claim 3, wherein the chimeric protein comprising the 64 of an integrin and the heavy chain of an immunoglobulin comprises the amino acid sequence of SEQ ID NO:1.
- 8. (Previously Amended) A chimeric protein heterodimer complex, according to claim 3, wherein the chimeric protein comprising the 62 of an integrin and the heavy chain of an immunoglobulin comprises the amino acid sequence of SEQ ID NO:19.
- 9. (Previously Amended) A chimeric protein heterodimer complex, according to claim 3 wherein the chimeric protein comprising the β 1 of an integrin and the heavy chain of an immunoglobulin comprises the amino acid sequence of SEQ ID NO:2.

10-24 (Canceled)

25. (Previously Amended) A drug composition, comprising a chimeric protein heterodimer complex as stated in claim 3.

26-49 (Canceled)

- 50. (Previously Added) A chimeric protein heterodimer complex, according to claim 3, wherein the α chain of said integrin and the β chain of said integrin are polypeptides derived from an extracellular portion, and wherein the heavy chain of said immunoglobulin is connected to a C terminus of both the α chain and the β chain of said integrin.
- 51. (Previously Added) The chimeric protein heterodimer complex, according to claim 4, wherein the polypeptide derived from an extracellular portion of the α chain of said integrin and the polypeptide derived from an extracellular portion of the β chain of said integrin are linked by a disulfide bond.
